AYURVEDA DEFINED

One of the world's oldest holistic healing systems. Developed thousands of years ago in India, Ayurveda is based on the belief that health and wellness depend on a delicate balance between the mind, body and soul.

THE TRIDOSHAS

The human body consists of three primary life forces or biological humors; vata, pitta and kapha. These three doshas are called the tridoshas. A balance among these life forces is essential.

VATA

VATA: derived from the elements of space and air; translates as "wind" or "that which moves things." The energy of movement and the force governing all biological activity.

PITTA

PITTA: derived from the elements of fire and water translates as "that which cooks." The energy of digestion and metabolism in the body.

KAPHA

KAPHA: derived from the elements of earth and water translates as "that which sticks." The energy of building and lubrication that provides the body with physical form, structure and the smooth functioning of all its parts.

AYURVEDIC WELLNESS TREATMENTS
